

# Warden® CX

By WINFIELD  
UNITED

## Superior Disease & Insect Protection for Soybeans

Warden® CX seed treatment can help optimize yield potential and improve root health and plant vigor by helping reduce disease and insect damage.

### FEATURES AND BENEFITS

- Contains three fungicides for multiple modes of action:
  - Sedaxane for *Rhizoctonia* protection.
  - Highest rate of mefenoxam commercially available for *Pythium* and *Phytophthora* protection.
  - Fludioxonil for protection from *Fusarium*.
- Includes active ingredient in Cruiser® insecticide for exceptional protection against an array of seed- and foliar-feeding insects.

### Increases Plant Growth

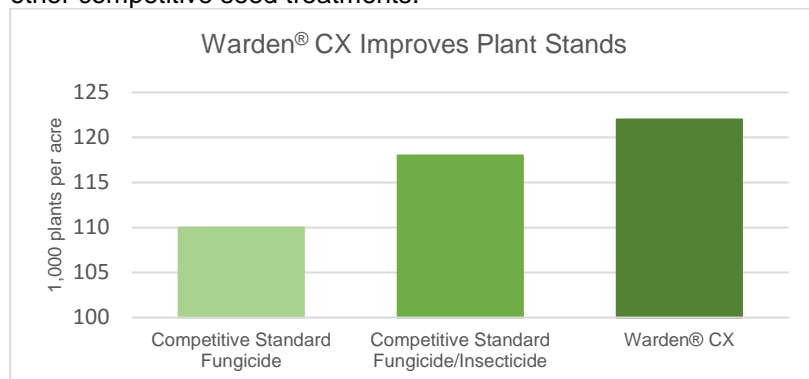

Soybean seeds treated with Warden® CX seed treatment (right) benefit from patented Vigor™ Effect of Cruiser® insecticide versus soybeans treated with another seed treatment (left).

Source: 2012 Answer Plot® field trials.

### Improves Plant Stands

Soybean stands increase after seed is treated with Warden® CX seed treatment versus other competitive seed treatments.
