

Activate Plus[™]

By WINFIELD

ADJUVANT
NONIONIC SURFACTANT

Premium 90/10 nonionic surfactant

High-Quality Surfactant

Activate Plus[™] adjuvant is a water-soluble, high-quality surfactant system for use with most postemergent crop protection products. This nonionic spreader/activator is low foaming for easy mixing.

Benefits

Activate Plus[™] adjuvant improves the properties of spray droplets, optimizing your crop protection product investment. Benefits of Activate Plus[™] adjuvant include:

- Low-foaming formulation
- Improved adhesion of spray droplets to the target plant's leaf surfaces
- Reduced surface tension, which allows droplets to spread out over a larger area of the leaf surface
- Improved wetting, spreading and dispersing of spray solution
- Increased pesticide absorption and efficacy
- Labeled for use with aquatic herbicides

Ingredients

Glycerol, sodium xylene sulfonate, alkyl phenol ethoxylate	90%
Constituents ineffective as spray adjuvant	10%
TOTAL	100%

Packaging

2 x 2.5-gallon jugs
4 x 1-gallon jugs
Mini-bulk
Bulk
Store above 32°F

Application Rates

These are suggested rates for use with various categories of crop protection products. Use a higher end of rate range in difficult wetting situations such as hard water or mature waxy foliage.

Product	Application Rate (per 100 Gallons Spray Solution)
Insecticides, miticides, fungicides	0.5 to 2 pints
Fertilizers and micronutrients	0.5 to 2 pints
Herbicides	1 to 4 pints
Glyphosate formulations without added surfactants	8 pints
Defoliants and desiccants	1 to 4 pints
Cotton pickers	0.5 to 0.75 pint
Gins	0.75 pint
Aquatic*	2 pints

*Regulations prohibit aquatic use in the state of Washington.
