

Ascend²[®]

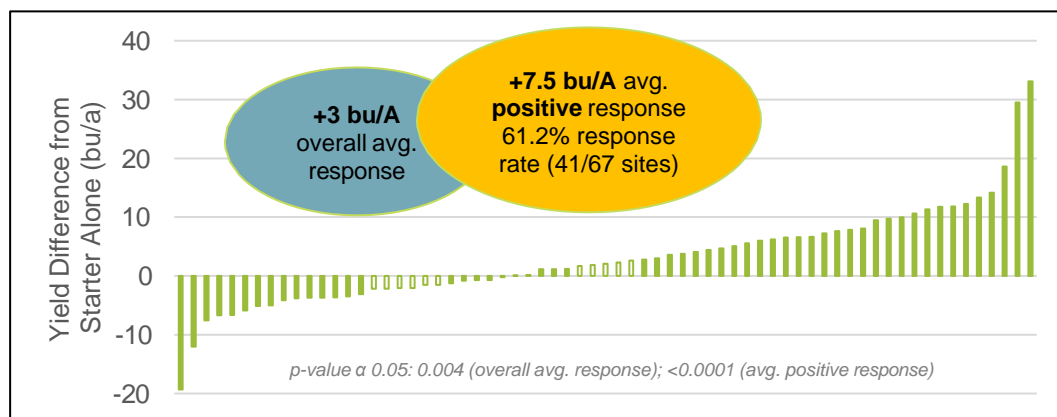

Optimized Corn In-Furrow PGR Blend

Ascend² plant growth regulator allows your genetics to live up to their potential by helping accelerate early season development, improve germination, and enhance root growth to build a strong foundation to help protect your investment from adverse conditions.

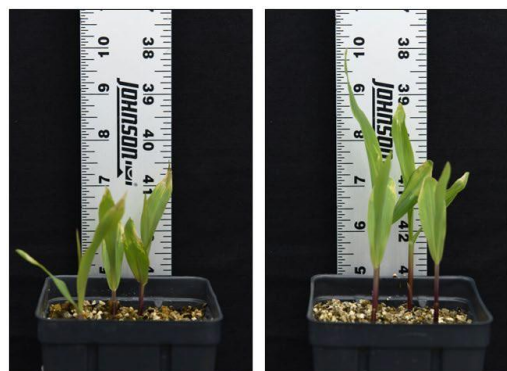

FEATURES AND BENEFITS

- Ascend² plant growth regulator (PGR) is the only auxin-dominant three-way PGR mixture on the market, which is important because auxins are crucial for early season growth and help alleviate early season crop stress.
- The unique, patented ratio of auxin, gibberellic acid and cytokinin in Ascend² PGR is optimized for in-furrow corn acres to help you protect your investment.
- Researched across 67 sites over 4 years, Ascend² PGR is data-backed to prove its consistent performance.

Ascend² PGR improved yield vs. starter alone
