## WinField Asulam 3.3

## Powerful weed control

## Effective Control of Challenging Weeds

Asulam 3.3 provides effective postemergence control of difficult grasses and some broadleaf weeds in sugarcane, noncrop, Christmas trees (Douglas fir, grand fir, noble fir, Scotch pine), ornamental shrubs (certain species of juniper and yew), and turf (sod farms).

## Weeds Controlled

Asulam 3.3 controls a variety of challenging grasses and other weeds, including the following:

Barnyardgrass
Bullgrass
Californiagrass
Crabgrass
Fall panicum
Foxtail species
Goosegrass
Itchgrass
Johnsongrass
Marestail (horseweed)
Sandbur
Western bracken
See label for weeds controlled in specific crops.

Application Rates and Timing

| Crop | Application Rate Range <br> (per Acre) |
| :--- | :---: |
| Sugarcane* | 6 to 8 pints (depending <br> on weed species) |
| Noncrop | 7 to 8 pints (depending <br> on weed species) |
| Christmas trees*** | 1 gallon** |
| Ornamental shrubs*** | 1 gallon** |
| Turf (sod farm only, except St. <br> Augustinegrass and Tifway 419 <br> Bermudagrass) | 8 pints** |
| Turf (sod farm only, St. <br> Augustinegrass and Tifway 419 <br> Bermudagrass) | 5 pints** |

*Tolerance to Asulam 3.3 EC may vary by variety. Contact your local extension agent or agronomist for more information.
**Maximum annual application.
***See label for specific species

## WinField Asulam 3.3

## Adjuvants Enhance Performance

To lock in spray coverage or deposition and lock out drift, include InterLock adjuvant. For tough-to-control weeds, add Preference adjuvant to applications in noncrop ( $0.25 \% \mathrm{v} / \mathrm{v}$ ) or sugarcane ( $0.25-0.5 \% \mathrm{v} / \mathrm{v}$ ). To improve spray performance in sugarcane, add Superb ${ }^{\circ}$ HC at 2 quarts per 100 gallons.

## Ingredients

Asulam
36.2\%
Inert ingredients 63.8\%

Total 100\%
Contains 3.3 pounds asulam per gallon.
