

Bison®

By WINFIELD

Selective postemergent broadleaf weed control in small grains and other crops

Effective Broadleaf Weed Control

Bison® herbicide, with the active ingredients bromoxynil and MCPA, provides selective postemergent control of many broadleaf weeds. It is labeled for use in wheat, barley, oats, rye, Conservation Reserve Program (CRP) grasses, grasses grown for seed production and flax.

Bison® herbicide offers a number of convenient application options, including ground, air or chemigation. For additional application flexibility, Bison® herbicide may also be tank mixed with a variety of herbicides, insecticides and liquid fertilizers. To lock in spray coverage or deposition and lock out drift, include InterLock® adjuvant.

Ingredients

Octanoic acid ester of bromoxynil	31.7%
2-ethylhexyl ester of 2-methylchlorophenoxyacetic acid	34.0%
Other ingredients	34.3%
TOTAL	100%

Bison® herbicide contains 2 pounds bromoxynil and 2 pounds MCPA acid per gallon.

Application Rates and Timing

Wheat, barley, oats and rye:

Postemergence — 1 to 2 pints per acre, depending on the crop, planting time and area

Post-harvest — 0.75 to 2 pints per acre (in Minnesota, Montana, North Dakota and South Dakota)

CRP grasses:

1 to 2 pints per acre from the three-leaf stage

Flax:

0.9 pint per acre when flax is 2 to 8 inches tall and before bud stage

Grasses grown for seed or sod production:

1 to 2 pints per acre before boot stage. See the label for tolerant grasses.

Weeds Controlled

Bison® herbicide controls a wide variety of broadleaf weeds, including the following:

Annual sowthistle	Marshelder
Coast fiddleneck	Mayweed
Common cocklebur	Morningglory
Common groundsel	Mustard species
Common lambsquarters	Nightshade species
Common tarweed	Pennsylvania smartweed
Corn chamomile	Pepperweed species
Corn gromwell	Pigweed species
Cow cockle	Prostrate knotweed
Field pennycress	Puncture vine
Fumitory	Ragweed, common and giant
Green smartweed	Russian thistle
Hemp sesbania	Shepherdspurse
Henbit	Sunflower
Horned poppy	Tall waterhemp
Jimsonweed	Tartary buckwheat
Knawel	Tarweed
Kochia	Velvetleaf
Ladysthumb	Wild buckwheat
Lanceleaf sage	Wild radish
London rocket	Yellow rocket
