

# Class Act<sup>®</sup> Ridion<sup>®</sup> By WINFIELD UNITED

## Adjuvant

### AMS-FREE WATER CONDITIONER FOR DICAMBA-BASED HERBICIDE TECHNOLOGIES

#### Non-AMS water conditioner, non-ionic surfactant, humectant

Class Act<sup>®</sup> Ridion<sup>®</sup> adjuvant offers an easy-to-use liquid formulation that combines dual chelation chemistry and WinField United's Cornsorb<sup>®</sup> additive for optimal herbicide performance. It is approved for use with Xtendimax<sup>®</sup>, FeXapan<sup>™</sup> and Engenia<sup>®</sup>.

Non-AMS Water Conditioner

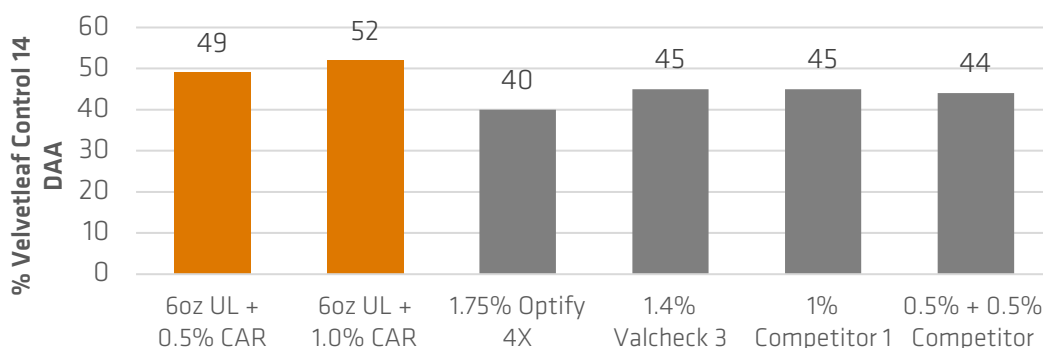

Surfactant

#### Features & Benefits

- Ties up harmful cations without the use of ammonium sulfate to optimize glyphosate and dicamba performance in the field
- CornSorb additive improves droplet spread and coverage, increasing herbicide uptake to optimize control
- Does not include AMS

#### Class Act<sup>®</sup> Ridion<sup>®</sup> provides superior control of velvetleaf with soft water

#### Use Rate

Optimum use rates for Class Act Ridion is 0.75% v/v or greater. This 0.75% rate meets the water conditioning needs of glyphosate brands like Tomahawk and Cornerstone<sup>®</sup> and other herbicides. Use lower rates with low water hardness and when weeds are small and actively growing. Use higher rates when water is harder, and weeds are difficult to control.

U.S. Patent Protected
