

WinField[™] Confidence[®] Brands

HERBICIDE
PRE- AND POSTEMERGENT
WEED CONTROL IN CORN

Target grass and broadleaf weeds with confidence

Flexible, Effective Weed Control

Confidence[®], Confidence[®] Xtra and Confidence[®] Xtra 5.6L herbicides deliver powerful preplant, preemergence or postemergence weed control in corn. Each controls a variety of annual grasses, certain broadleaf weeds and yellow nutsedge.

Confidence[®] herbicides may be tank mixed with a variety of other preemergent residual herbicides for added control of various weed species or with post-applied corn herbicides, such as glyphosate, for residual grass and certain broadleaf weed control. All brands are formulated as a liquid emulsifiable concentrate to easily mix with water and most fluid fertilizer sources.

Labeled Crops

Confidence[®] herbicides are labeled for field corn, production seed corn, silage corn, sweet corn and popcorn. See the labels for application timing and restrictions.

Application Timing

Confidence[®] herbicides may be applied at early preplant (up to 45 days ahead of planting), preplant, preplant incorporated or preemergence. A burndown herbicide should be tank mixed with Confidence[®] herbicides if weeds have emerged prior to a non-incorporated application.

Confidence[®] herbicides may be tank mixed with many postemergent corn herbicides for residual weed control in corn up to 11 inches tall. However, Confidence[®] herbicides may not be applied postemergence in sweet corn.

Ingredients

Confidence [®]	
Acetochlor	75.9%
Other ingredients	24.1%
TOTAL	100%

Confidence [®] Xtra	
Acetochlor	46.3%
Atrazine	18.3%
Other ingredients	35.4%
TOTAL	100%

Confidence [®] Xtra 5.6L	
Acetochlor	33.4%
Atrazine	26.9%
Other ingredients	39.7%
TOTAL	100%

Confidence[®] herbicide contains 7 pounds acetochlor per gallon. Confidence[®] Xtra herbicide contains 6 pounds active ingredient per gallon, 4.3 pounds acetochlor plus 1.7 pounds of atrazine. Confidence[®] Xtra 5.6L herbicide contains 5.6 pounds active ingredient per gallon, 3.1 pounds acetochlor plus 2.5 pounds of atrazine.

WinFieldTM Confidence[®] Brands

HERBICIDE
PRE- AND POSTEMERGENT
WEED CONTROL IN CORN

Weeds Controlled

Confidence[®] herbicides control and/or suppress many annual grasses and broadleaf weeds, including the following:

- Barnyardgrass
- Carpetweed
- Common ragweed
- Crabgrass
- Fall panicum
- Foxtail (giant, green, robust purple, robust white and yellow)
- Goosegrass
- Henbit
- Lambsquarters
- Nightshade (black and hairy)
- Pigweed
- Purslane
- Sandbur*
- Seedling johnsongrass*
- Shattercane*
- Waterhemp
- Witchgrass
- Woolly cupgrass**
- Yellow nutsedge***

Confidence[®] Xtra and Confidence[®] Xtra 5.6L herbicides also control the following weeds:

- Annual morningglory**
- Annual smartweed
- Cocklebur**
- Florida beggarweed
- Florida pusley
- Galinsoga
- Groundcherry
- Jimsonweed
- Mustard
- Prickly sida
- Velvetleaf**

Tank mixes and/or cultivation enhance control of many hard-to-suppress weed species and are often recommended.

*Suppression only.

**Use higher rates.

***PPI.

Application Rates

Application rates for all Confidence[®] herbicides depend on the soil texture, organic matter percentage, time of application and tank-mix partner.

Adjuvants Enhance Performance

To lock in spray coverage or deposition and lock out drift, include InterLock[®] adjuvant.

Packaging

- Bulk
- Mini-bulk
