

# Everlon™

## Disease Control Across a Broad Range of Crops

With two powerful modes of action, Everlon™ fungicide protects a wide range of crops from fungi and other stressors. It provides long-lasting disease protection, post-infection disease control and plant health benefits to help protect your investment.

### FEATURES AND BENEFITS

- Formulated with two modes of action, fluxapyroxad and pyraclostrobin, to deliver long-lasting disease protection on a wide range of crops.
- Promotes plant health benefits including healthy, dark green leaves for improved photosynthesis and increased plant stress tolerance to optimize yield potential.
- Provides more consistent performance with preventative and curative defense for maximum yield potential.

### Help protect crop potential from yield-robbing diseases

Key diseases controlled or suppressed		
<b>Soybean</b>		
Alternaria Leaf Spot	Anthrachnose	Asian Soybean Rust
Brown Spot	Cercospora Blight	Frogeye Leaf Spot
Pod and Stem Blight	Rhizoctonia Aerial Blight	Target Spot
<b>Sunflower</b>		
Phomopsis	Rust & white rust	Septoria leaf spot
Powdery mildew	Alternaria leaf spot	Cercospora leaf spot
<b>Alfalfa</b>		
Anthrachnose	Leaf spot	Downy mildew
Rhizoctonia blight	Rust	Spring/summer black stem & leaf spot
Stagonospora leaf spot	Stemphyllium leaf spot	Yellow leaf blotch

#### USE RATE†

Varies based on many application factors. See label for details.

#### ACTIVE INGREDIENTS†

14.33%: Fluxapyroxad  
28.58%: Pyraclostrobin  
57.09%: Other Ingredients

#### PACKAGING

2 x 2.5 gallons

### Pair with MasterLock® adjuvant for maximum effectiveness

When you invest in a fungicide application, ensure you're maximizing its disease control potential by adding MasterLock adjuvant to the tank. WinField® United Answer Plot® data has shown a 5.7-bushel-per-acre average yield increase in corn when MasterLock adjuvant is added to the spray tank along with a fungicide, compared to using a fungicide alone.\*
