Adjuvant

IMPROVES SPRAY COVERAGE AND PERFORMANCE

Nonionic Surfactant

One of the best-in-class, time-tested nonionic surfactants, Preference[®] improves the properties of spray droplets, optimizing your crop protection product performance.

Surfactant

Features & Benefits

- Improved adhesion of spray droplets
- Enhances droplet spreading by reducing surface tension
- Slower rate of spray evaporation
- Protection against ultraviolet rays for less spray degradation

Example of the effect of Preference[®] Adjuvant on Spray Solutions

Use Rate

Suggested Rates with Various Pesticides and Fertilizers per 100 gallons of Spray Solution

Preference [®] (pints)	Product Group
0.5 to 2	Insecticide, Miticides and Fungicides
1 to 4	Herbicides
8	Glyphosate formulations without added surfactants
1 to 4	Defoliants and Desiccants
0.5 to 2	Fertilizers and Micronutrients
2 to 4	Aquatic Herbicides
