Section[®] Three = Weed Free

Section[®] Three herbicide provides the high-performance grass control you expect from a clethodim formulation, but with 50% more active ingredient per gallon, there is less storage and handling costs compared to the standard 2 lb. formulation. It provides fast control of a broad spectrum of emerged annual and perennial grass weeds including; volunteer corn and volunteer cereals.

FEATURES AND BENEFITS

- Proprietary 3 lb. per gallon formulation
- Less storage and handling costs
- Wide application window for outstanding application flexibility
- Can be tank-mixed with many other herbicides, insecticides, fungicides, and micronutrients and can be applied by ground or air

Section[®] Three Needs an Adjuvant for Maximum Effectiveness

Section[®] Three requires an adjuvant for effective control of grass weeds. Tank mix with a high surfactant crop oil concentrate adjuvant to maximize coverage.

Same great fast acting grass control but less storage and handling

Section[®] Three at 4 fl. oz. per acre 11 days after treatment

Section[®] 2EC at 6 fl. oz. per acre 11 days after treatment

USE RATE[†]

Varies based on many application factors. See label for details.
