

WinFieldTM Simazine 4L/90DF

HERBICIDE
RESIDUAL, BROAD-SPECTRUM CONTROL

For control of problematic grasses and
broadleaf weeds

Product Use

Simazine herbicides are preemergence herbicides that control a wide range of grasses and broadleaf weeds. They can be tank mixed with atrazine herbicides in corn for enhanced weed control. They can also be tank mixed with various herbicides in certain labeled crops for enhanced weed control.

Weeds Controlled

Simazine herbicides control a number of difficult grasses and broadleaf weeds, including:

- Barnyardgrass
- Carpetweed
- Common chickweed
- Common lambsquarters
- Crabgrass species
- Downy brome
- Fall panicum
- Fiddleneck
- Filaree
- Fireweed
- Florida pusley
- Foxtail species
- Goosegrass
- Henbit
- Junglerice
- Nightshade species
- Ragweed species
- Wild oats
- Signalgrass
- Spanish needles
- Witchgrass

Labeled Crops

- Avocados
- Blueberries
- Caneberries
- Citrus (grapefruit, lemons, oranges)*
- Field and sweet corn
- Filberts (hazelnuts)
- Grapes
- Macadamia nuts
- Nurseries, Christmas trees, shelterbelts
- Olives
- Pecans
- Strawberries
- Tree fruit (apples, pears, sweet and sour cherries, peaches, plums)
- Turfgrass (sod, fairways, lawns)
- Walnuts

*Certain states only
