

# Testify™

By WINFIELD UNITED

Testify™ herbicide provides corn growers with broadleaf and grass control that helps set a strong foundation for clean fields. Residual control and rapid burndown provide broad-spectrum weed control to enable maximum yield protection potential.

## FEATURES AND BENEFITS

- Residual control for effective pre-emergence application
- Broad-spectrum grass and broadleaf weed control
- Labeled for corn and soybeans, which helps you manage crop splits and provides planting flexibility the following spring
- Mixable with liquid fertilizer
- Low use rate

## Use an Adjuvant for Maximum Burndown Effectiveness

Testify™ herbicide requires an adjuvant for effective burndown applications. Tank mix with a high surfactant crop oil concentrate adjuvant, like StrikeLock®, to maximize effectiveness.

Velvetleaf – 7 days after application

Untreated

Testify™ (16 fl oz/A) +  
StrikeLock® (12 fl oz/A)

Herbicide  
Group 14 – Saflufenacil  
Group 15 – Dimethenamid-P

### USE RATE†

Varies based on many application factors. See label for details.

### ACTIVE INGREDIENTS†

6.24%: Saflufenacil  
55.04%: Dimethenamid-P  
38.72%: Other ingredients\*

Contains 0.57 pounds of saflufenacil and 5.0 pounds of dimethenamid-P per gallon, formulated as an emulsifiable concentrate

\*Contains petroleum distillates

### PACKAGING

265-gallon tote  
Bulk

† Always read and follow product labels directions.
