

Total[®]

Get Total[®] Control of Your Weeds.

Total[®] herbicide will provide control of emerged annual and perennial grass and broadleaf weeds in LibertyLink[®] or glufosinate tolerant canola, corn, cotton, and soybeans. It is also labeled for use in tree, vine and nut crops.

FEATURES AND BENEFITS

- Group 10 mode of action helps manage triazine, ALS, and glyphosate resistant weeds
- Fast and effective control in days not weeks or many tough-to-control grass and broadleaf weeds
- Use a top of the line water conditioner for optimal control.
