

Transfix®

By WINFIELD

Pinene-based sticking agent

Cost-Effective, Quality Formula

Transfix® adjuvant matches the performance of premium-priced products with an economical pinene formula that delivers performance advantages. This adjuvant enhances penetration of active ingredients into the leaf and facilitates proper adhesion. Its polymerized pinene base remains pliable, maintaining coverage as leaves grow. Transfix® adjuvant mixes easily with crop protection products and foliar micronutrients, reducing runoff losses from rain or irrigation.

Application Rate

Application rates depend on the product formulation being used. Use 4 to 6 ounces of Transfix® adjuvant per acre with insecticides, fungicides and herbicides, and 4 ounces per acre with foliar nutrients. Use 4 to 6 ounces per 100 gallons in air blast and hydraulic gun sprayers. Use 4 to 6 ounces per acre with aircraft sprayers. Transfix® adjuvant should be applied at least one hour before an expected rainfall while sunlight is present to enhance bonding to crop foliage.

Ingredients

Beta-pinene polymer	96.0%
Constituents ineffective as spray adjuvant	4.0%
TOTAL	100%

Packaging

| 4 x 1-gallon jugs
