

Tundra[®] LFC

By WINFIELD UNITED

Broad Spectrum Insect Control

Tundra LFC insecticide provides broad spectrum control of many different insect species while also being Liquid Fertilizer Compatible (LFC). This allows for early season control of seedling pests that can decrease yield potential.

FEATURES AND BENEFITS

- Complements insect protection traits in seeds by controlling secondary pest at economical use rates.
- Compatible with most liquid fertilizer mixes that are used in furrow.
- Another mode of action against early season insect pests.
