

# Valcheck<sup>®</sup> AMS+DRT

## Adjuvant

### **AMS-BASED WATER CONDITIONER + DRIFT REDUCTION AGENT**

Improves efficiency of AMS-compatible herbicides

#### Features & Benefits

- Helps increase the performance of herbicides
- Controls droplet size increasing retention on the leaf surface
- Decreases antagonism due to cations in the tank
- Designed to be used with any herbicide that calls for AMS

#### Use Rate

Valcheck AMS+DRT contains ammonium sulfate solutions and a pre-measured amount of polymeric deposition agent. To meet various label recommendations, include:

- 2.5 gallons of Valcheck AMS+DRT per 100 gallons to equal 8.5 pounds of ammonium sulfate with a moderate amount of deposition agent to reduce spray drift.
- 5 gallons of Valcheck AMS+DRT to equal 17 pounds of ammonium sulfate with a full amount of deposition agent to reduce spray drift.
