

Valcheck® II

Adjuvant

NON-AMS WATER CONDITIONER + NONIONIC SURFACTANT + DRIFT REDUCTION AGENT (DRA)

Water Conditioner

Surfactant

Approved DRA*

Meets the requirements for many dicamba applications.

Features & Benefits

- Reduces hard water antagonism of glyphosate using an AMS-free water conditioner that does not contribute to the volatility of dicamba
- Surfactant for enhanced spreading, penetration, and uptake
- Approved as a DRA for many tank mixtures – always check the manufacturers' websites for recent tank mix approvals
- Low-foaming formulation

Use Rate

The minimum use rate of Valcheck® II depends on the tank mix partner and if it is being used as a DRA. Refer to the label for detailed use rate requirements.

Herbicide	Minimum approved rate
DuPont™ FeXapan® plus VaporGrip® Technology	0.75% v/v (as DRA)
Engenia®	0.625% v/v (as DRA)
Tavium® Plus VaporGrip® Technology	0.625% v/v (as DRA)
XtendiMax® with VaporGrip® Technology	0.75% v/v (as DRA)
