**DIRECTIONS FOR USE
FOR USE WITH COMMERCIAL APPLICATOR TANKS**

PROTANK CLEANER should be part of a tripe rinse program.

USE RATE: PROTANK CLEANER should be used at a rate of 1 – 2 Liter(s) of PROTANK CLEANER per 200 gallons (757 Liters) of water.

USE INSTRUCTIONS:

Close valve to spray boom. Open bypass valve and agitate vigorously. Spray all interior and exterior surfaces to remove residues with cleaning solution. Open spray boom to flush rinse solution out of tank through the boom. Refill with water and empty sprayer through boom nozzles. Rinse tank by following same procedure using water only. A three minute rinse using cold water is necessary.

When using PROTANK CLEANER to clean tanks left standing or containing built-up residue from extended use, allow the cleaning solution longer time to act.

PROTANK CLEANER's cleansing action may remove rust and scale that was sealing a badly corroded tank, however, it will not harm steel, aluminum, brass or poly tanks and parts if directions concerning rinsing are followed.

STORAGE AND DISPOSAL

Recyclable Container Disposal: Store in a well-ventilated and locked place. Keep container tightly closed. Store above 12°C (55° F). Do not freeze. Store in original container only. Dispose of contents/container in accordance with Federal, provincial and local regulations. Do not reuse this container for any purpose. This is a recyclable container, and is to be disposed of at a container collection site. Contact your local distributor/dealer or municipality for the location of the nearest collection site. Before taking the container to the collection site:

1. Triple- or pressure-rinse the empty container. Add the rinsings to the spray mixture in the tank.
2. Make the empty, rinsed container unsuitable for further use.

If there is no container collection site in your area, dispose of the container in accordance with provincial requirements
