# Stonewall 540

## **ACTIVE** Glyphosate

Stonewall<sup>®</sup> 540 provides grass and broadleaf weed control in glyphosate tolerant crops.

# **FEATURES & BENEFITS**

- Stonewall 540 is a post-emergent, non-selective herbicide that is absorbed and translocated through weeds for "shoots-to-roots" control.
- Stonewall 540 controls more than 100 annual and perennial weeds and includes versatile use patterns including in-crop applications in Roundup Ready<sup>®</sup> and TruFlex<sup>™</sup> canola crops, as well as pre-seed, pre-harvest and post-harvest applications.
- Hard water can reduce the activity of glyphosate. Test your water and add Crimson<sup>®</sup> NG to reduce the effects of hard water and other cations.
