

Fast Break®

By WINFIELD UNITED

Decrease spray-tank mixing and filling time with aggressive foam-preventing activity. A highly effective silicone emulsion. Fast Break® is an easy-to-use liquid antifoam agent that prevents excessive foaming without interaction with spray mixture active ingredients.

FEATURES & BENEFITS

APPLICATION INFORMATION

- Fast Break is formulated to prevent foaming when mixing spray solutions.
- Add Fast Break to the spray water before adding crop protection products.
- Use Fast Break at the rate of 30 mL (1 oz) per 100 US gals of solution.

Water hardness, temperature and individual spray-tank mixtures may affect the amount of Fast Break needed. Adjust use rate to achieve desired foam control.

COMMON USE RATE

30 mL (1 oz) per 100 US gals of spray solution

PACKAGING

12 x 473 mL jugs/case

ACTIVE INGREDIENTS

Dimethylpolysiloxane, methylated silicon and inert ingredients

PRODUCT GROUP

Utility modifier

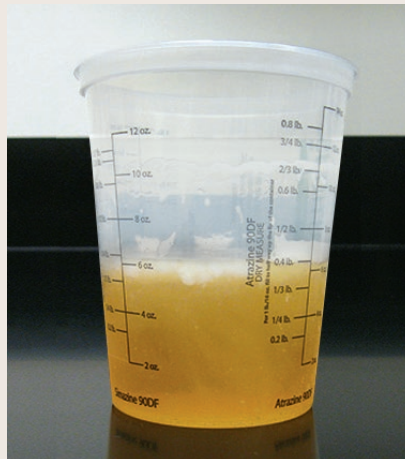

Water + Pesticide

No Fast Break

Foaming Observed
